

Minutes

- Explained changes from POC to MVP:
 - OICD/Security
 - Sessions
 - Matching
 - Cancellation of meals and requests
 - URL catching
- Alice noted it is good that we are meeting with Suzy Nelson
- Alice liked the fact that a refresh keeps you on the current page
- Husayn mentions bug of front end
- Giulio elaborated
- Husayn mentions the cap
- No description of the algorithm mentioned by Alice
- No clearing of stale meals and requests
- Bugs:
 - Clicking multiple times on donate
 - Empty requests go through
- Beautify the requests times and locations
- Note non-existence of meals/requests
- Alice: Add break between the two sections of meals and requests
- Alice: Change log out button
- Kostas: Use finally for the update to fix last cancellation bug
- Do not allow empty requests
- Notification system is still being added
- Our tables are being cleared only for matched cases
- Our tables do not delete old requests
- Meeting with Suzy
 - We will collect data
 - We will monitor application usage
 - We trust the MIT student body
- Blockchain laughs
- Discussion about the anonymity vs. need:
 - Anonymity good for the shy
 - Anonymity possibly exploitable
