

- Overview of our project (3 mins)
- Current State: (5 mins)
 - Buggy matching
 - Insecure
 - Nice UI start
 - Doesn't support new users
- Demo (3 mins)
- Goals for MVP: (5 mins)
 - Delete fulfilled requests
 - Cancel requests
 - URL catching
 - UI/UX improvements
 - Matching algorithm - important to get a basic matching
 - Make it secure
 - Sessions
 - Creation of Users
 - Management of User Account
- Achieved and missed milestones: (3 mins)
 - Missed:
 - Creation of a user
 - Fell a little short of matching algorithm because it is buggy
 - Achieved
 - Guest requests and Host requests work
 - We have a basic structure for both front end and back end
- Changes to Design: (3 mins)
 - Possibly not doing MIT certificate - may opt for email verification
- Q and A (5 mins)
